

LITTLE RED MASK DURING THE CORONAVIRUS.

nce upon a time in 2020, there was a little girl who always wore a red protection mask. This was the reason everybody called her Little red mask, she was a very good girl and conscientious.

One day, Little red mask's mum asked her to take her coronavirus sceptic grandma some stuff. So, her mum put one-liter cans of strawberry antibacterial gels and a thousand protection masks in a basket.

Now, Little red mask's mum loved her child and knew a big bad virus lived in the woods, so she said to Little red mask, *"you be careful of coughing strangers, my dear. You must go straight into grandma's house. Don't talk to any strangers and don't touch them and when you have given grandma her basket, you must come straight to home and wash your hands for at least 30 seconds"*.

Now, little red mask was a good little girl, so she told her Mummy she would do just that. The problem was, she LOVED talking and she soon stopped to talk with a stranger. The coughing stranger came and said, *"Hello little girl"*. Suddenly, Little red mask remembered what her mummy had said about not talking and touching any strangers, but she was a very polite girl, so she put on a new mask and answered.

"Hello coughing man,"

"kofkofkof, where are you...kofkofkof... going?"

"I'm going to visit my coronavirus sceptic grandma who lives in a little house in the woods to protect her against the big bad virus" answered Little red mask. And she showed the stranger her survival basket.

Little red mask said goodbye to the coughing man, who replied mysteriously: see you soon.

Little red mask looked at her awesome smart watch which alerted her directly to new cases of coronavirus and saw it was lunchtime, so she quickly went to her coronavirus sceptic grandma's house. But the coronavirus was quicker than Little red riding hood, it got to grandma's house in a flash and contaminated her. Little red mask soon arrived at grandma's house and knocked at the door.

"Come in! Kof kofkof", said grandma with difficulty.

When she saw her coronavirus sceptic grandma lying in bed, she thought she looked a little sick, so she wore a new protection mask because protection time is really short, and she had failed to find FFP2 masks in the supermarket.

"What bad cough you have grand-mama!" she remarked

"All the better to ring my chiming bell, my child" answered grandma

"What a high temperature you have! Grand-mama!"

"It is useful to save energy, my child, heating is expensive this year." Replied grandma.

And it is at this moment, that her grandma begin to be in pain and said it was just a little flu, but, luckily for little red mask, a white-coated doctor was passing grandma's house just at this moment and heard the grandma cough, so she quickly went in to see what was happening and revived her. Then, the doctor went home, and Little red mask gave grandma her antibacterial gels and protection masks, since that day, grandma was never sceptical of the coronavirus again and now she sneezes in her elbow.

They all lived safely ever after during the 2020 pandemic with all their supplies of rice, pasta and toilet paper.
